Jurimetrics

José de Jesus Filho   Julio Trecenti

Brussels, July 06

What is jurimetrics?

- ▶ Statistics in the law
- ▶ Jurimetrics Brazilian Association

Jurimetrics: spheres

- One litigation
  - Compensating for the loss of a chance
- Many litigations
  - Predictive models
  - Decision making
  - Topic models
- Public policy
  - Public policy impact
- Court administration
  - litigation complecity
  - court productivity

Orgs

- github.com/abjur: ABJ's org
- github.com/courtsbr: github organisation
- github.com/decryptr: breaking CAPTCHAs using R

Packages

- `tjsp` and `esaj` packages: web scraping.
- `jurisMiner`: analyze judicial text data.
- . . .

Download: usage

```r
library(tjsp)
s <- cjsg_session()
parms <- cjsg_parms(s, livre = 'erro medico')
cjsg(s, parms, path = 'data-raw', max_pag = 10)
```

Parsing: usage

```
files <- dir('data-raw', full.names = TRUE)
d_cjsg <- parse_cjsg(files)

tibble::glimpse(d_cjsg, width = 50)
## Observations: 200
## Variables: 8
## $ n_processo      <chr> "1013781-16.2015.8.26...
## $ comarca         <chr> "Santos", "São Paulo"...
## $ data_julgamento <chr> "15/06/2017", "13/06/...
## $ data_registro   <chr> "15/06/2017", "15/06/...
## $ ementa          <chr> "EMBARGOS DE DECLARAÇ...
## $ orgao_julgador  <chr> "5ª Câmara de Direito...
## $ relatora        <chr> "Fábio Podestá", "Val...
## $ classe_assunto  <chr> "Embargos de Declaraç...
```

Download and parse full decision

```r
code <- d_cjsg$cd_acordao[1]
tjsp::download_pdf(code, 'data-raw')
```

# Clean text data

Topic models

- unsupervised learning of litigation topics
Predictive models

- Using bag of words + LASSO, RF, NN etc.

Influence diagrams: decision

- bayesian network with decision node.

Breaking CAPTCHAs

Breaking captchas

```r
library(decryptr)
read_captcha('data-raw/captcha.png') %>% plot()
```

```r
captchaSajAudio::decifrar('data-raw/captcha.mp3')
## [1] "emcdz"
```

Future work: tech

- Better scrapers
- Public API

Future work: research

- Most relevant arguments
